Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	10/670,054	ANDERSON, PETER TRANEUS	
	Examiner	Art Unit	
	JAY M. PATIDAR	2858	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Continuation of Attachment(s) 3). Information Disclosure Statement(s) (PTO/SB/08), Paper No(s)/Mail Date :09/24/2003;02/10/2005;09/04/2009.

1. This communication is in response to applicant's response received on April 22, 2010.

2. Claims 10-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on April 22, 2010. Applicant's election with traverse of in the reply is acknowledged. The traversal is on the ground(s) that the examination can be made without serious burden. This is not found persuasive because the search required for group II is not required for group III as explained in the previous office action.

The requirement is still deemed proper and is therefore made FINAL.

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

4. Claims 16-17,26-27 are objected to because of the following informalities:

In claim 16, it is unclear as to what a plurality of tracking system architectures is; it is not clearly defined;

In claim 17, it is unclear as to what a processing scheme is; it is not clearly defined;

In claims 26-27, it is vague as to whether the transmitter and receiver are the same as of claim 16 or different.

Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 16-27 are rejected under 35 U.S.C. 102(e) as being anticipated by Govari (2005/0024043).

Govari discloses an electromagnetic tracking system including at least one of a transmitter e.g. 22,24,26 and a receiver e.g. 27,28,29 for measuring a position in a coordinate system; tracker electronics e.g. 36

for determining position of at least one of a transmitter and a receiver using information from the at least one of a transmitter and a receiver, the tracker electronics configurable for a different plurality of tracking system (paras 0034,0035,0038,0047,0048; note whole document). The use of softwares and memories is inherently disclosed by Govari.
